Breakfast Hour Repo Setup!

By: Kelly Slatery

What are we doing when we git add, commit, push?
Come on mic!
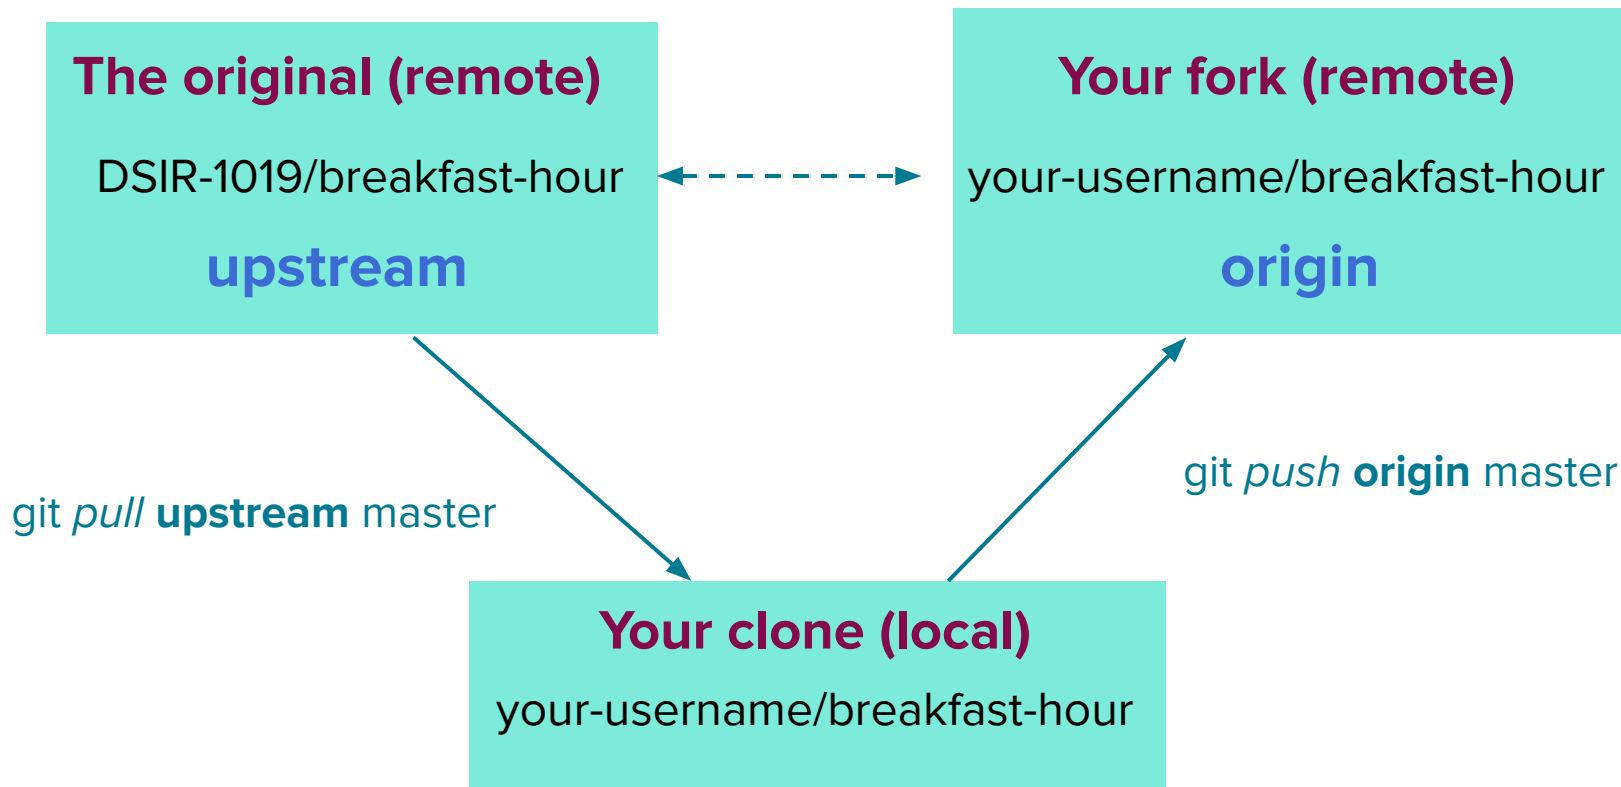

git push origin master
What do each of the words in this command line code mean?
[THREAD]

Why do we use the word "origin"?
Come on mic!

The original (remote)

DSIR-1019/breakfast-hour

upstream

Your fork (remote)

your-username/breakfast-hour

origin

git *pull* **upstream** master

git *push* **origin** master

Your clone (local)

your-username/breakfast-hour

How to Add Remote Repo

1. Fork & clone: https://git.generalassemb.ly/DSIR-1019/breakfast-hour
2. git remote -v

   origin   git@git.generalassemb.ly:your-username/breakfast-hour.git (fetch)
   origin   git@git.generalassemb.ly:your-username/breakfast-hour.git (push)

3. git remote add upstream [DSIR-1019 breakfast-hour clone link]
4. git remote -v

   origin   git@git.generalassemb.ly:your-username/breakfast-hour.git (fetch)
   origin   git@git.generalassemb.ly:your-username/breakfast-hour.git (push)
   upstream   git@git.generalassemb.ly:DSIR-1019/breakfast-hour.git (fetch)
   upstream   git@git.generalassemb.ly:DSIR-1019/breakfast-hour.git (push)

REMEMBER!!!

1. **ALWAYS** *"Make a Copy" / "Duplicate"* and make you changes to that copy of the notebook

    a. OR if you forget, just rename the notebook before committing your changes

2. **ALWAYS** *push* your local changes to your fork BEFORE pulling

    a. git push origin master

3. THEN you can *pull* our changes/updates from the original DSIR-1019/breakfast-hour

    a. git pull upstream master
